

3 Layered Clean Architecture

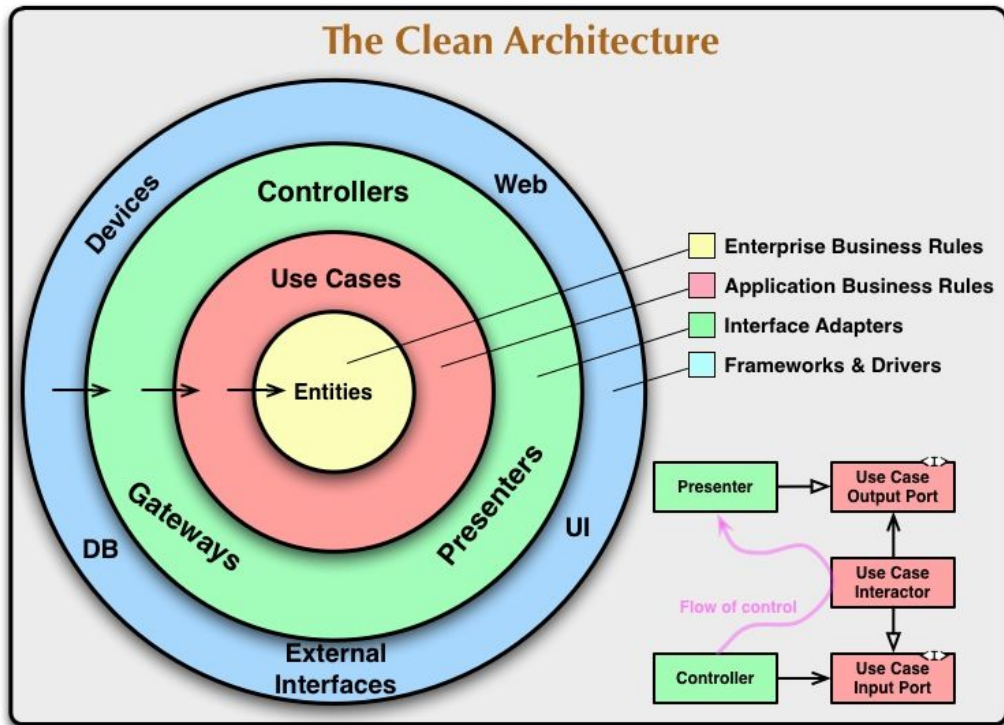

Manu Diaz

Senior Client Engineer - Pod 2

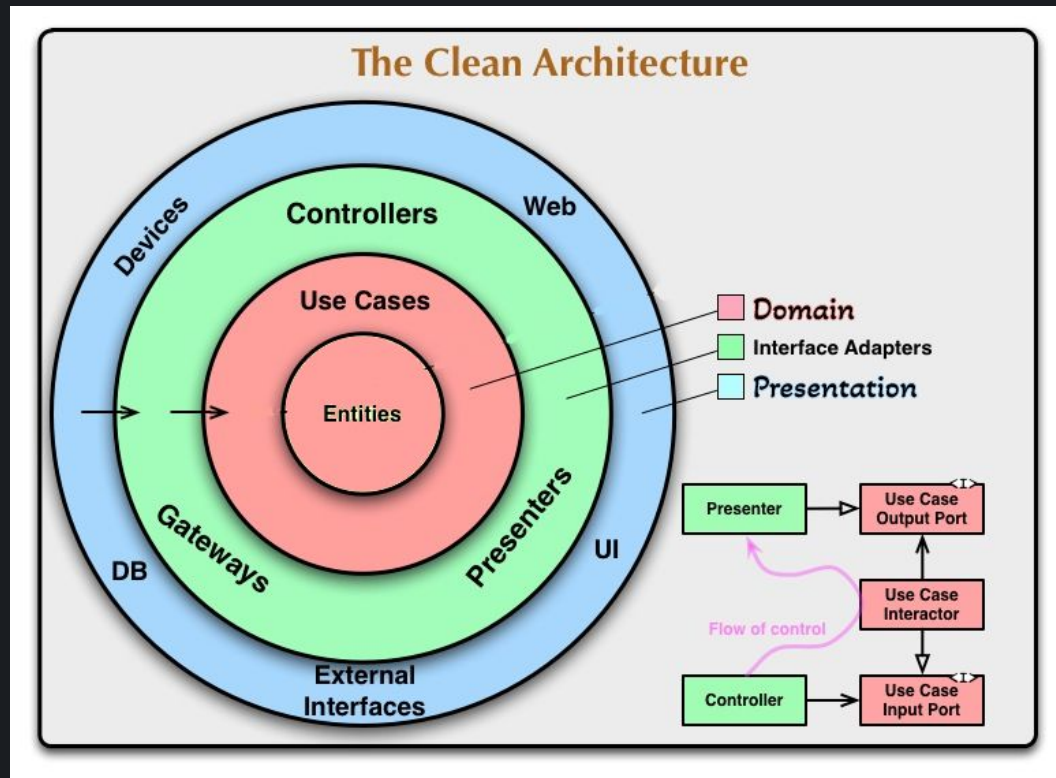

confidential

Clean Architecture - Basics

- **Arrow rule:** source code dependencies always point inwards.
- **Dependency Inversion:** dependencies on inner layers are done through *Interfaces*.
- **Independent of any external agency:** business rules simply don't know anything at all about the outside world.

Clean Architecture - 3 Layer version

- **Domain Layer:** Use Cases + Entities
- **Reactive UI**

Clean Architecture - 3 Layer version
